description The blade-torsion-spring  
EA-9000NSU is equipped with two 1 1/2"  
modular end-loads and two universal constant-  
velocity joints. It is designed for use in a  
wide variety of applications including  
precision engineering (rapid prototyping),  
precision machining, and mobile CNC  
machining and robotic assembly. Compact  
design; Open end-load configuration;  
Adjustable ballscrew (CNC) spindle is  
designed for compact assemblies; Steel  
construction; Solid end-load rods; Optional  
cold-hammering; Optional side-loads (CNC)  
spindle is designed for compact assemblies;

---

Steel construction; Optional side-loads (CNC) spindle is designed for compact assemblies. 1/2" holes are drilled with a 3/4" ball tap; Optional cold-hammering is available on all end-load options.; Optional side-loads (CNC) spindle is designed for compact assemblies; Steel construction; Optional side-loads (CNC) spindle is designed for compact assemblies; Steel construction; Optional side-loads (CNC) spindle is designed for compact assemblies.
